B) Disposable Surgical Caps/Bouffant Caps/Nurse Caps/Hood Caps

Micro-organisms in large numbers are found on the scalp and hair. Movement of the head releases bacteria from the hair and scalp. Dandruff, which is a fungus, is also

responsible for contaminating the air in the Operating Room . The only effective way to prevent Post-Operative Wound Infections is to put on a surgical headwear/cap, so as to contain the hair and prevent dandruff, bacteria and skin scales from settling on the instruments and equipments to be used during a surgical procedure

Headwear/Disposable Caps are available in Medical Blue/Medical Green and White.

FEATURES:

The headwears/caps are made from Spun Bond Non-Woven Fabric which has excellent water repellency and air-breathability (as it allows air to escape so that the scalp can breathe), thereby negating fungal or bacterial growth on the scalp. These are specifically designed to contain the hair, provide comfort, dryness to the wearer and prevents migration of skin scales thereby protects the patient from Post-Operative Wound Infections.

PACKING: Surgeon's Caps (Ties, Elastic Band & Hood Style) AND Bouffant Caps are available in Packing – 100 pcs and 50 Pcs.

C) DISPOSABLE APRONS
